

Welcome to Detroit Drone

Capability Statement

About Us

Our Drone Services include aerial photography, videography, progress photos or videos, and RTK photogrammetry or orthomosaic maps. All our quality drones have been upgraded in 2022 to keep up with the latest and greatest technology available, so we may be able to offer those great results to you, our Customers. We can produce up to 5.2k resolution and our RTK drones can provide measurements that are within centimeters of accuracy. We can capture images in high-resolution, create accurate Maps and 3D Models of your projects, where you can also check elevation changes, take measurements of area and volume with our easy-to-use software. Along with our RTK enabled drones, these are results you can trust.

Our Services

- Drone corridor
